

Modular Water & Wastewater Treatment Plants

Deploy fully integrated modular water treatment systems to reduce project timelines, minimize site disruption, and scale with demand.

MULTI-STAGE MODULAR TREATMENT PLANTS

Komline Pure Water's Modular Water & Wastewater Treatment Plants are engineered for fast deployment, operational reliability, and long-term scalability. Designed as fully integrated, pre-fabricated systems, these plants streamline installation and commissioning while reducing capital and operational complexity.

Our modular platforms incorporate proven treatment technologies including coagulation & flocculation, dissolved air flotation (DAF), membrane filtration (UF/MF), biological treatment (MBBR/MBR), media filtration, sludge thickening & dewatering, and advanced disinfection systems (UV/chlorination) to deliver consistent, high-quality effluent.

From municipal to industrial applications, these systems provide advanced treatment performance within a compact footprint, with flexible expansion to meet evolving capacity and regulatory requirements.

KEY ELEMENTS

- ✓ Pre Fabricated Modular Plants
- ✓ Rapid Deployment Compact, Small Footprint
- ✓ Scalable Modular Water & Wastewater Treatment Plants
- ✓ Proven Compliance
- ✓ Remote Monitoring & Control

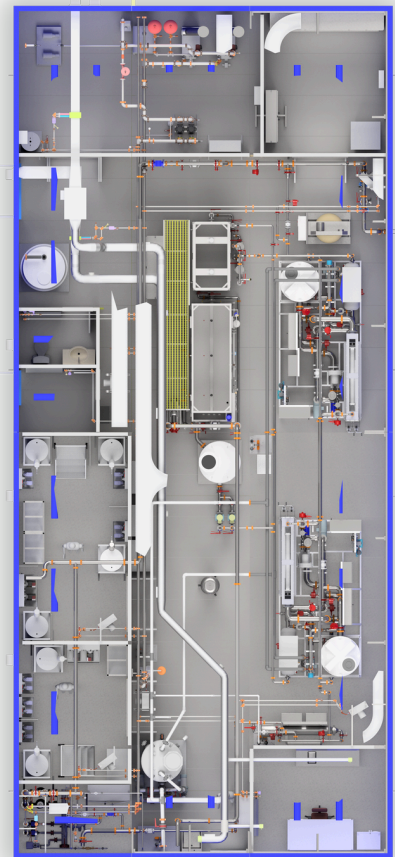

OPERATIONAL BENEFITS & KEY PERFORMANCE ADVANTAGES

- Up to 50% faster deployment vs. conventional stick-built systems
- Plug-and-play integration reduces installation and commissioning time
- Scalable modular design adapts to future capacity requirements
- Lower CAPEX & OPEX through optimized footprint and energy efficiency
- Pre-engineered & factory-tested for reduced project risk
- Advanced automation & controls for real-time monitoring and optimization
- Compact footprint ideal for space-constrained sites
- Reduced site disruption with off-site fabrication
- High reliability & redundancy built into system architecture
- Customizable treatment configurations for diverse water challenges

APPLICATIONS

- Municipal Drinking Water Treatment
- Industrial Wastewater Treatment
- Mining & Resource Sector Water Management
- Food & Beverage Processing
- Power Generation Facilities
- Remote & Decentralized Communities
- Emergency & Temporary Water Treatment Systems
- Water Reuse & Recycling Systems

Whale Cove Water Treatment Plant

SERVICES & PARTS

Need a replacement part?

Contact our sales team and ask about our inventory of 1000+ parts—both third-party and Komline—to support your needs. Even better, ask about ProCare, our proactive service and maintenance package tailored to your operations.
